

SHANNON LAKE

GOLF CLUB

Member Food & Beverage Minimum

In 2026, the Board of Directors decided to implement a food & beverage minimum spend at the club for all adult and intermediate members. Junior members are exempt from the requirement.

- Shareholders that take out an annual membership are required to spend \$500 annually
- Grandfathered members are required to spend \$500 annually
- Intermediate-29 members are required to spend \$300 annually
- We will be asking all 2026 members to make a “payment on account” for their required spend on or around the first day they start to golf

In order to get better data on how much our members spend at the facility and to budget for a rewards program in future years, we will be asking all members to use their in-house “charge accounts” when making food & beverage purchases at the club.

This process will be required to make use of the initial food & beverage minimum and then it will be required for all future F&B purchases.

Summary

- Use of member charge accounts are encouraged for all food & beverage purchases
- Members can access their account with their name or membership number
 - If you can remember your member number it will be easier for the serving staff to process your member charge
- Management will be compiling spending data in order to create a rewards program for our members going forward
- Monthly statements are emailed out at the beginning of each month
- If there is a credit card on file, the amount owing will be charged automatically
- If there is no credit card on file, members are required to pay off their balance by the 15th of each month
- There is a link on the membership page to access your account on-line

We appreciate all our members support with this new program. The Management Team!
